

AI Job Hunt Agent

Automated LinkedIn Job Discovery & Resume Matching System

Amar Nath Yadav | Delivery Manager | Bangalore, India

Overview

A fully automated, zero-cost job hunting pipeline that scrapes LinkedIn daily for senior Delivery & Program Management roles, scores each listing against your resume using AI, and surfaces only the best matches in a live Airtable dashboard — no manual searching required.

Quick Reference

Dashboard URL	https://airtable.com/app38sqAEAtse3Jjz/pagyaRO7SIKYEbUyy/edit
Runs Daily At	07:00 AM TPE (Taipei Time) — fully automatic
Manual Trigger	GitHub → Actions → Daily LinkedIn Job Scrape → Run workflow (select claude-job-agent branch)
GitHub Repo	github.com/anyadav/my-repository Branch: claude-job-agent
Target Roles	Delivery Manager, Program Manager, Delivery Head, Account Delivery Head, Project Manager, Engineering Manager
Match Logic	≥90% → Shortlisted <90% → Skipped None qualify → Top 5 shown 10 jobs per run (last 48 hrs, Easy Apply)

Implementation Architecture

The pipeline runs end-to-end on free-tier services. Each daily run executes 4 sequential steps automatically:

01	 Clear Airtable	All previous listings deleted. Dashboard always shows only today's fresh results — no stale data accumulates.
02	 LinkedIn Scrape	JobSpy (free, open-source Python) scrapes LinkedIn across 6 role titles with Easy Apply ON, last 48 hrs, Bangalore. Top 10 unique results pushed to Airtable as Pending Review.
03	 AI Scoring	Google Gemini 2.0 Flash (free tier) reads job description + resume. Returns 0–100 match score with reasoning. Rate-limited to 12 RPM with exponential backoff. ≥90% → Shortlisted, <90% → Skipped. Hiring manager details extracted only if explicitly in posting.
04	 Dashboard	Airtable Interface reflects live results sorted by Match Score descending. Share with colleagues by email (read-only). Remove access anytime via Share panel.

Technology Stack & GitHub Secrets

Component	Tool	GitHub Secret	Notes
Scheduler	GitHub Actions (Free)	—	Runs at 23:00 UTC = 07:00 TPE. Branch: claude-job-agent
Job Scraper	JobSpy (OSS Python)	—	Scrapes LinkedIn public pages, no paid API needed
AI Scoring	Google Gemini 2.0 Flash	GEMINI_API_KEY	Free tier: 1,500 req/day from Google AI Studio
Database	Airtable (Free tier)	AIRTABLE_TOKEN	Base: app38sqAEAtse3Jjz Table: tblk6YG2x2PgwRdVN
Dashboard	Airtable Interface	—	Live shareable URL, add/remove access by email

Built with GitHub Actions · JobSpy · Google Gemini · Airtable | All services on free tier | Zero cost to operate
